4 basic principles central to Community Development:

In groups research the following
foundations of Community
Development

Locality

Equity

Participation

Self Reliance

A **locality** is a place — a town,
a neighbourhood, a housing estate
or a rural area

Locality

Equity

Equity extract from a concept of social justice. It represents a belief that there are some things which people should have, that there are basic needs that should be fulfilled, that burdens and rewards should not be spread too differently across the community, and that policy should be directed with impartiality, fairness and justice towards these ends

Falk, Jim, Hampton, Greg, Hodgkinson, Ann, Parker, Kevin and Rorris, Arthur, 1993, *Social Equity and the Urban Environment*, Report to the Commonwealth Environment Protection Agency, AGPS, Canberra

Participation

Community participation is the process by which individuals, families or communities assume responsibility for their own welfare and develop a capacity to contribute to their own and the community's development

Oakley and Marsden(1987)

Self-reliance

Reliance on your capabilities, judgement, or resources.

Communities need to be encouraged (empowered) to manage their own affairs – therefore the aim of the Community Development worker is to do themselves out of a job.

What can be achieved with Community Development?

Human Rights:

An understanding of Human
Rights is an essential and central
principle of
Community Development

Human Rights

Human rights recognise the inherent value of each person, regardless of background, where we live, what we look like, what we think or what we believe.

They are based on principles of dignity, equality and mutual respect, which are shared across cultures, religions and philosophies. They are about being treated fairly, treating others fairly and having the ability to make genuine choices in our daily lives
